Objective

As a recent graduate with a Bachelor's degree in Computer Science and a strong foundation in software development, I am seeking an Engineering Tech position where I can leverage my technical skills in Python, Java, and web development. My background in project-based learning and internships has equipped me with the practical experience and problem-solving abilities essential for contributing effectively in a technical engineering role.

Technical Skills

- **Programming Languages:** Python, Java, MySQL, JavaScript

- **Web Technologies:** HTML, CSS, MongoDB

- **Tools:** Git, Docker

- **Cloud:** Google Cloud Big Data and Machine Learning Fundamentals

- **Frameworks:** Flask

My background in Computer Science, combined with hands-on project experience, positions me as a strong candidate for the Engineering Tech role. I have developed solid programming skills in Python and Java, and I'm proficient in web development and database management. I've applied these skills in real-world projects, including a blood bank management system and a user management platform, which involved both front-end and back-end development. These projects have sharpened my problem-solving abilities and deepened my understanding of the software development lifecycle.

One of my proudest achievements is securing second place in a frontend hackathon, which highlighted my innovative thinking and attention to detail. I'm also committed to continuous learning, whether it's exploring big data and machine learning or mastering new tools like Docker and cloud technologies.

Beyond technical skills, I value collaboration and effective communication. I enjoy working in teams, sharing ideas, and tackling challenges together. I'm confident that my combination of technical expertise, project experience, and eagerness to learn makes me a great fit for your team. I'm excited about the opportunity to contribute and grow in this role. In addition to my technical skills, I bring a strong sense of responsibility and a commitment to delivering high-quality work. I have a keen eye for detail, which ensures that I consistently meet project requirements and exceed expectations. My adaptability allows me to quickly grasp new concepts and integrate them into my workflow.
